My Cloud Story:

BH: This is an excerpt from one of our puppet shows called "Ellingtown." It's about the music of Duke Ellington. It's something that we take a lot on our puppet truck to schools and out to the community. It's one of our most popular puppet shows. The set looks like a combination of the city and a keyboard. There are all of these musical elements on the puppetry set. The set is very tall, and everything is really alive on it. At one point the whole city even comes to life. We have a lovely little moment that fits with the theme for the day, so we thought we would do that for you.

(production begins)

Voiceover: It comes from somewhere deep inside. It comes from your heart. It comes from what you feel as you go through your day. All the things that happen, the people that you meet when you're out and about, that kind of thing.

(*Piano begins. Man walks out on sidewalk. Man sits down to look at the sky. Enter cloud puppets, rotating clockwise. A bunny cloud appears and the man fades from the scene. Then a cat cloud, a treble clef cloud, a smiling-laughing face cloud. A small plane appears along with the sound of a small plane engine. A cloud hand waves to signal end of scene.)
